VF-SOTT Series

Live streaming encoder
for over the top applications

【Overview】

VF-SENC-103S iPhone edition encoder supports the latest iPhone, iPad and iPod Touch running iOS, and enables the streaming of real-time video to these terminals (also known as HTTP Live Streaming). It encodes the input video in real-time and generates video file and play list file to be made available on the included HTTP server.

- Supports delivery to iPhone, iPad and iPod Touch
- For broadcast service using telecommunication networks
- High quality encoder

【Application】

- Streaming of live camera on local spots
- Delivery of smart grid video
- Video on Demand (VOD)
- Remote and mobile Monitoring
